

**SUBCONTRACTOR SUPPLIED PROPERTY AT THE FACILITY**

In performance of the Reliability Engineering Support Services (RESS) effort, the Subcontractor will provide, as a minimum, the following property and equipment:

1. FURNITURE AND HARDWARE:

- a. Appropriate office furniture to support personnel requirements.
- b. At least one (1) computer system (CPU, monitor and necessary peripherals), PC or MAC, or equivalent, for each employee;
- c. Computer systems and peripherals (including network cabling, as appropriate) dedicated to the Subcontractor's interoffice network and a T-1 line required for interface with the JPL network internet protocols to allow for virtual private network (VPN) access;
- d. Appropriate PC, UNIX or equivalent system, as a facility server and for engineering file backup needs;
- e. All necessary office equipment (i.e. copier, fax, scanner, etc.);
- f. Telephone voicemail capability and a business-only cellular phone for each Contractor employee.

2. SOFTWARE:

To ensure interoperability with the JPL staff, hardware procured must be able to support the following software requirements:

- a. Current version of the MS-Office Suite (Word, Excel, Powerpoint) compatible with JPL for each Contractor employee; an internet-based email and a web browser;
- b. The contractor should provide adequate copies or a site license for the following -
  - 1. Microsoft Visio Software (graphics)
  - 2. Microsoft Project (for graphics and scheduling)
  - 3. Systems Improved Numerical Differential Analyzer (SINDA) /Thermal Radiation Analyzer System (TRASYS)
  - 4. PSPICE Modeling/Simulation software (for PC)

Note: Hardware and software requirements are subject to change during the duration of the contract.
